1. Display all the first names in lower case and the last names in upper case as the single column separated with ' - '. Provide the meaningful name to the column.

```
d5_96305_sanchit> select concat(lower(first_name), '-' ,upper(last_name)) as full_name from employees;
+-------------------+
| full_name         |
+-------------------+
| ellen-ABEL        |
| sundar-ANDE       |
| mozhe-ATKINSON    |
| shelli-BAIDA      |
| amit-BANDA        |
| elizabeth-BATES   |
| sarah-BELL        |
```

2. Display the first word of the job title. (Hint : Use substring_index).

```
d5_96305_sanchit> select substring_index(job_title,' ',1) from jobs;
+-----------------------------------+
| substring_index(job_title,' ',1) |
+-----------------------------------+
| Public                            |
| Accounting                        |
| Administration                    |
| President                         |
| Administration                    |
| Accountant                        |
| Finance                           |
| Human                             |
```

3. Display the First name, last name and length of first name for the employees whose last name contains character ‘b’ anywhere after 3rd position.

```
d5_96305_sanchit> select first_name, last_name, length(first_name) from employees where last_name like '___%b%';
+-------------+-----------+--------------------+
| first_name | last_name | length(first_name) |
+-------------+-----------+--------------------+
| Gerald      | Cambrault |                  6 |
| Nanette     | Cambrault |                  7 |
| Nancy       | Gruenberg |                  5 |
| Susan       | Jacobs    |                  5 |
+-------------+-----------+--------------------+
4 rows in set (0.162 sec)

d5_96305_sanchit>
```

4. Display the employee id, first name and last name of the employees whose first or last name includes a space in between.

```
d5_96305_sanchit> select employee_id, first_name, last_name from employees where locate(' ',first_name) !=0 or locate(' ', last_name) !=0;
+-------------+-------------+-----------+
| employee_id | first_name  | last_name |
+-------------+-------------+-----------+
|         112 | Jose Manuel | Urman     |
+-------------+-------------+-----------+
1 row in set (0.012 sec)

d5_96305_sanchit>
```

5. Display first name, salary, and round the salary to thousands.

```
d5_96305_sanchit> select first_name , round(salary,-3) from employees;
+-------------+------------------+
| first_name  | round(salary,-3) |
+-------------+------------------+
| Steven      |            24000 |
| Neena       |            17000 |
| Lex         |            17000 |
| Alexander   |             9000 |
| Bruce       |             6000 |
| David       |             5000 |
| Valli       |             5000 |
| Diana       |             4000 |
| Nancy       |            12000 |
```

6. 6. Display employee ID and the date on which he ended his previous job in the format as mentioned. (Format: Thursday, October 27th 2011)

```
d5_96305_sanchit> select employee_id , date_format(end_date,'%W, %M %D %Y')  as end_date from job_history;
+-------------+-----------------------------+
| employee_id | end_date                    |
+-------------+-----------------------------+
|         101 | Thursday, October 27th 2011 |
|         101 | Sunday, March 15th 2015     |
|         102 | Sunday, July 24th 2016      |
|         114 | Sunday, December 31st 2017  |
|         122 | Sunday, December 31st 2017  |
|         176 | Saturday, December 31st 2016 |
```

7. Display first name and date of first salary of the employees. (Consider 1st day of month as salary day. HINT: LAST_DAY).

```
d5_96305_sanchit> select employee_id, first_name, hire_date, adddate(last_day(hire_date), interval 1 day) as first_sal from employees;
+-------------+-------------+------------+------------+
| employee_id | first_name  | hire_date  | first_sal  |
+-------------+-------------+------------+------------+
|         100 | Steven      | 2013-06-17 | 2013-07-01 |
|         101 | Neena       | 2015-09-21 | 2015-10-01 |
|         102 | Lex         | 2011-01-13 | 2011-02-01 |
|         103 | Alexander   | 2016-01-03 | 2016-02-01 |
|         104 | Bruce       | 2017-05-21 | 2017-06-01 |
|         105 | David       | 2015-06-25 | 2015-07-01 |
|         106 | Valli       | 2016-02-05 | 2016-03-01 |
|         107 | Diana       | 2017-02-07 | 2017-03-01 |
|         108 | Nancy       | 2012-08-17 | 2012-09-01 |
|         109 | Daniel      | 2012-08-16 | 2012-09-01 |
|         110 | John        | 2015-09-28 | 2015-10-01 |
|         111 | Ismael      | 2015-09-30 | 2015-10-01 |
|         112 | Jose Manuel | 2016-03-07 | 2016-04-01 |
|         113 | Luis        | 2017-12-07 | 2018-01-01 |
```

8. Display first name and experience of the employees in the format of number of years, months and days completed.

9. Display the employee id, first name and joining date of the employees who joined in the month of august of any year.

```
d5_96305_sanchit> select employee_id, first_name,hire_date from employees where month(hire_date) = '08';
+-------------+------------+------------+
| employee_id | first_name | hire_date  |
+-------------+------------+------------+
|         108 | Nancy      | 2012-08-17 |
|         109 | Daniel     | 2012-08-16 |
|         119 | Karen      | 2017-08-10 |
|         129 | Laura      | 2015-08-20 |
|         134 | Michael    | 2016-08-26 |
|         152 | Peter      | 2015-08-20 |
|         158 | Allan      | 2014-08-01 |
|         189 | Jennifer   | 2015-08-13 |
|         202 | Pat        | 2015-08-17 |
+-------------+------------+------------+
9 rows in set (0.006 sec)

d5_96305_sanchit>
```

10. Display the details of employees who joined before the year 2015.

```
d5_96305_sanchit> select employee_id, hire_date from employees where year(hire_date) < 2015;
+-------------+------------+
| employee_id | hire_date  |
+-------------+------------+
|         100 | 2013-06-17 |
|         102 | 2011-01-13 |
|         108 | 2012-08-17 |
|         109 | 2012-08-16 |
|         114 | 2012-12-07 |
